Young Engineer of the Year Award 2004 - Ir Dr LAU Kin Tak

The presentation of the Young Engineer of the Year Award 2004 was made at the 29th Annual Dinner. This year, the Grand Prize goes to Ir Dr Lau Kin-tak.

From a technical apprentice to sales engineer, and currently the Assistant Professor of Department of Mechanical Engineering of the Hong Kong Polytechnic University, Ir Dr Lau has been striving for continuous learning.

Ir Dr Lau has been involved in organising various local and international conferences. He is one of the Chairs of the Symposium on Nano-composites for Space and Infrastructure Applications and the Ninth International Conference of Composite Engineering.

Ir Dr Lau has an notable contribution to the profession. He was one of the founding officers for the establishment of the American Society of Mechanical Engineers, Hong Kong Student Section and assisted in establishing the Institution of Engineers, Australia, Hong Kong Chapter. His achievement in profession has been recognised when he was conferred the Young Scientist Award 2002.

Ir Dr Lau is eager to share his professional knowledge and experience with young people through teaching and organising talks and seminars with an aim to broaden the horizons of the younger generation. It is hope that Ir Dr Lau can serve as the role model to encourage young engineers for life-long learning and to get themselves actively involved in the services of the community and engineering profession.

Ir Dr Alex Chan presented the award to Ir Dr Lau Kin-tak (R)
