

- **Programme title and organiser(s)**

Technical Seminar on "Fire Resistance Design and Fire Damage Assessment of Reinforced Concrete Buildings "

- **Date, Time and Venue**

22 Jan 2019 (Tue)
6:30 p.m. – 8:00 p.m.
HKIE Headquarter

- **Speaker(s) (if applicable)**

Ir Dr WONG, Yuk Lung, Professor of the Department of Civil Engineering, Chu Hai College of Higher Education

- **Programme highlight**

The structural stability of reinforced concrete buildings exposed to fire has a significant role in the design process. Reinforced concrete can achieve a considerable level of fire resistance inherently even without additional protection when properly designed.

In the seminar, the design requirements and practices for fire resistance design of reinforced concrete buildings in Hong Kong will be covered. Methodology of fire damage analysis and assessment of reinforced concrete buildings after a fire blaze will also be introduced.

- **Registration details**

The seminar is free-of-charge. No prior registration is required. The number of participants is limited to 60 and seats will be allocated on a first-come-first-served basis

- **Enquiry details**
