

Fire Division

Technical Talk – Fire Protection Solutions Consideration for Data Centre

Date, Time & Venue

19 September 2023 (Tue); 6:30pm – 8:00pm [Hktime] (Registration starts at 6:15pm)

Venue: HKIE HQ Chan Yat Mei Sophie Room

Programme Highlights

Hong Kong is a major financial and international trading and logistics hub and is home to many regional offices and headquarters of global corporations. This generates great demand for secure data centre facilities and services to support business growth in the Mainland of China and the region. Hong Kong is an ideal location for data centres with our robust telecommunications infrastructure as well as geographical and strategic advantages.

The primary goal in any data centre is to minimise operational interruptions and to protect people and property effectively. Fire safety is therefore a long-term investment to ensure the business continuity of any data centre.

Design Consideration on fire prevention solutions will be presented for planning a Data Centre.

Speakers

Ir Bryan Fung

Director

Project Management | Mission Critical, China Region

WSP (Asia) Limited
