

## Chairman's message

By Ir Philip Kwong

The Veneree Club gathers a group of retired engineers from different disciplines and aims to provide a platform for members to broaden their exposure to a wider range of topics, share their experiences and serve the society.

Ir Philip Kwong, Chairman for Session 2019/2020

Thanks to the efforts of our Committee Members over the past seven years, we have successfully attracted more and more retired engineers to join our activities.

Our monthly talks cover a wide variety of topics that relate to our age and social issues such as health, wealth management, culture and history, which are far beyond the engineering matters we used to engage in during our career. In the coming year, we will further extend our network to invite more popular speakers to our tea gatherings.

Apart from talks, we also organise outings and visits to new technology

centres, museums and other interesting venues, and arrange social activities for sharing and learning. These outings always receive a very good response from our members.

We also emphasise serving society particularly for young engineers. In the coming year, we will continue our good tradition of holding an annual Engineering Exposition. It is an excellent occasion for the upcoming generation to learn from senior members how to face challenges in life and what attitude they should adopt to achieve their career goals.
